Description: this is a unique event to discuss and understand issues as well as to explore and exchange ideas on – but not limited to – the topics raised during presentations on Day 1!

It is a conversational moment in which small groups of people will get the chance to have open and creative conversations on a topic of mutual interest, gain a deeper understanding of the issues involved, share their collective knowledge and experience, and exchange ideas and possible solutions.

Organization: it will be conducted into 3 to 4 parallel “round tables” (suitable groups), each one with a moderator and tentatively proposed as follows:

Diverse inputs	Focused Conversation	Multi-outputs
<ul style="list-style-type: none">• Topics from Day 1• Issues/problems• Experiences	<ul style="list-style-type: none">• Design / guidelines• Simulation / modeling / tools• Measurements / testing/ diagnosis• EMC compliance / standards	<ul style="list-style-type: none">• Knowledge• Ideas/solutions• Networking

Friendly reminder: please join the table that best fits your interests! But do not miss the opportunity to also engage with other tables: exchange between groups will be encouraged roughly every 15 mins.
